I would appreciate your attendance at a meeting to be held in my office at 6:00 p.m. on July 29, 1965, on the above subject. We will be meeting with others concerned with the same subject, largely from inside Government.

Our objective will be to identify and lay plans for the careful development and review of potential legislative proposals to the second session of the 89th Congress in the field of transportation. These special arrangements are intended to supplement and support, not replace or undercut, the existing procedures and instructions for the development and submission of legislative proposals through more normal channels.

I will have some specific suggestions that will need to be staffed out and some others for discussion. It will be helpful if you can organize your own suggestions for fruitful areas of exploration so that we can discuss them at the meeting.

Our broad objective, of course, is a 1966 Legislative Program which will be as appealing as was this year's, as thoroughly related to our national well-being and to the objectives of the Great Society, and as practical of achievement.

I will look forward to meeting with you.

MEMORANDUM FOR Honorable Alan Boyd
Under Secretary of Commerce
for Transportation
Department of Commerce

In accordance with our discussion Friday morning, August 6, 1965, this memorandum establishes a Task Force on Transportation for the Fiscal Year 1966 legislative program. To be chaired by you, the Task Force will include representatives from the Commerce and Treasury Departments, the Council of Economic Advisers, the Office of Science and Technology, the Housing and Home Finance Agency, and the Bureau of the Budget. I suggest that you discuss with heads of these agencies the individuals to represent them on the Task Force.

This special Task Force effort reflects our deep concern with many problems in the transportation field. In view of these problems it is our earnest desire to develop a vigorous and imaginative program for consideration by the Second Session of the 89th Congress.

Pursuant to the understanding reached at the meeting, the Task Force should not consider matters relating to the commercial supersonic transport program or the Maritime Program.

We would like you to conduct staff studies of the ideas and proposals listed below. The end product with respect to each should be a paper which contains the following information:

1. A statement of the idea, proposal and/or problem to be resolved.
2. What the Federal government is currently doing in the area of the proposal, including a description (with costs) of the present programs, the people whom those programs reach, and the needs these programs fulfill and fail to fulfill.
