

GO BEYOND STATIC ROUTES AND SCHEDULES WITH ON-DEMAND RIDESHARING

Seamless ridesharing

Integrated fixed route & demand response

Electronic dispatch

360° fleet monitoring

Automated fare collection

Deeper insights

Solutions & Benefits

We make life easier for transportation managers by intensifying vehicle utilization, enhancing customer service, simplifying driver workflow, and improving cost control. Amplify the power of your transportation infrastructure.

● Seamless ridesharing

Fulfill your mission in the most economical and environmentally-friendly way possible by dispatching vehicles when and where they're needed and keeping your seats occupied.

● Electronic dispatch

Reduce dispatch cost by orders of magnitude, minimize human error, and strengthen on-time performance. Your customers will rave about your service as drivers fulfill real-time requests with continuously updated turn-by-turn directions.

● Automated fare collection

Expedite boarding and improve revenue control by letting customers buy and store fare credit using a credit card.

● Integrated fixed route & demand response

Optimize the balance between demand-response service and the scheduled bus according to easily adjustable quality of service parameters.

● 360° fleet monitoring

Empower one person to monitor thousands of rides with the intuitive Visualizer - you'll see everything about your operations and fix problems before they occur with only iPads and an internet connection.

● Deeper insights

See further into your operations with sophisticated analytics. Instantly translate performance, cost, and customer data into actionable intelligence.

No more costly software installations that quickly become obsolete.

Our field-tested technology is deployable within weeks, hosted in the Cloud, and updated dynamically.

Customers

We create transformational outcomes.

Public transit agencies

Planned communities

College & corporate campuses

Vanpools & carpools

Press

Via's technology powers our revolutionary on-demand transit system in New York City, which provides hundreds of thousands of rides per month. For more information on our rapidly-growing service, please see the articles below.

Our Mission

We're public transportation visionaries. As the world becomes more urban, it's increasingly vital to reduce traffic congestion, mitigate carbon emissions, and connect people with economic opportunities.

But we know that fiscal constraints make it difficult to mobilize the resources - and generate the political will - necessary to build physical systems. Via's virtual infrastructure strengthens your sustainability and magnifies your relevance without the kind of capital expenditures associated with traditional transit investment. Your transportation mission is ours.

Please contact us for more information about how real-time ridesharing can upgrade your transportation system.
